

Corrections Checklist Based on Assessor Feedback

Layout / UX (LO1)

Feedback	Addressed?
Scrollable book section too small, especially on mobile	Replaced with a clearly listed book list and mobile-friendly cards
Navigation inconsistent across pages	Base template ensures consistent header/footer/navigation
Sign-up form not working	Fixed and tested with validation, now documented in TESTING.md
PEP8 issues in views.py	Re-validated, passed, and screenshots provided
Signup bugs blocked testing of swap	Fully tested and documented in both README and TESTING.md

Authentication & Permissions (LO3)

Feedback	Addressed?
Signup didn't work	Fixed and proven via manual testing
No way to test swaps	Now possible and tested
Permissions (e.g., users can't access edit/delete of others' books)	Access control tested with examples in TESTING.md
Login state not clearly shown	Added dynamic login status badge ("Guest" or username shown)

Agile Planning (LO1.5, LO1.6, LO1.12)

Feedback	Addressed?
No clear sprint separation	Two GitHub project boards now reflect Sprint 1 and resubmission sprint
No user story labels / acceptance criteria	User stories now include checklists, and issues are closed and mapped
Missing documentation of project management process	Agile Planning section with screenshots and links now included

Testing (LO4)

Feedback	Addressed?
Testing too brief	TESTING.md now includes full manual testing, validators, bugs/fixes, screenshots
No screenshots or test outcomes	All results visualised and linked in TESTING.md
HTML, CSS, Python validation not shown	Screenshots for W3C and PEP8 all added

Security (LO5, LO6)

Feedback	Addressed?
.env file present in repo	Now removed and .gitignore used correctly
Sensitive values exposed	All hidden via environment variables on Heroku
DEBUG=True at submission	Now False and documented in README
Deployment steps too vague	Full local + Heroku deployment steps added (with pip freeze, gunicorn etc.)

CRUD Feedback & Swap Functionality (LO2, LO3)

Feedback	Addressed?
SwapRequest model not registered in admin	Registered and login details for admin shared in README
No feedback after actions like add/edit	Flash messages shown and screenshot-proof provided
Swap logic couldn't be tested	Now fully working, with repeat swap prevention
